

# Card Payments

**JewelMaster** supports PaymentSense with direct confirmation via the normal payment buttons of your EPOS setup

## Card Machine

- Award winning (Sunday Times Top 200) online payment provider
- 24/7 UK based support, including next day machine replacement
- No PCI issues. The link is direct to the internet, not built into your business network
- Very competitive rates

## JewelMaster

- Easy setup and configuration
- Identify one payment button as "PaymentSense"
- JewelMaster automatically identifies (without a user clicking anything) when the card transaction is a success or failure
- Full card reporting from inside JewelMaster
- All Card Machine interactions (card not read, card failure, card machine offline, etc) auto linked into JewelMaster

## Your Customers

- Easy to use card machine that can wander around your store with your customer
- No extra wait to manually confirm payment in JewelMaster or chance of an incorrect value
- Superfast connections and verification speeds
